ENTERPRISE SUPPORT FOR TIKI WIKI CMS GROUPWARE

Tiki has a time-based, "Release early, Release often" approach with Long Term Support (LTS) versions, to balance the needs of stability and innovation. The Long Term Support (LTS) versions are supported for 5 years by the community. This satisfies the needs of most projects.

However, some projects need longer support periods. These are typically enterprise projects. And thus, Avan.Tech offers professional enterprise support for up to 10 years. Please contact us for pricing.

Do you support all the plugins and modifications?

Yes.

Tiki smartly avoids 3rd party plugins: http://pluginproblems.com/Modules-Extensions

As for your modifications, we will analyze them, and support them.
